

Amendments To The Abstract:

In the English translation document, please add the section heading at page 9 line 1, as follows:

--ABSTRACT

In prior art, through holes often have to be after-treated manually. Disclosed is a method allowing through holes to be after-treated in a chemical or electrochemical manner with the aid of a material-removing agent, the outer surface located around a discharge port of the through hole being protected accordingly from being attacked by the agent that is to be removed.--
